EDUCATION

Universitas Teknologi Yogyakarta | 2024

Bachelor of Information Technology
Final Project: Technology Information | Data Encryption and Decryption using DES Method

SKILLS

- Computer operation & technical administration
- Data management and work reporting
- Basic understanding of IT systems and networks
- Reading basic wiring diagrams & P&ID
- Implementation of SOP and HSE (K3)

CERTIFICATION

- Microsoft Specialist - Certiport

WORK EXPERIENCE

Production Operator – PT Pertama Precision Indonesia

- Worked as a WVC Production Operator, responsible for installing cable plugs/connectors, crimping, and wiring assembly according to SOP and company quality standards.
- Ensured wiring results were neat, strong, and met production quality requirements.

Washing Boats & Yacht – Freelance (Sentosa Cove)

- Responsible for washing and basic maintenance of boats and yachts in accordance with cleanliness and safety standards.
- Maintained work areas and equipment to ensure safe and efficient operations.

Instrument Control Training – PT Bintang Alumina Indonesia

- Assisted in installation, inspection, and maintenance of process instruments such as sensors, transmitters, control valves, and instrument panels.
- Performed basic instrument calibration (pressure, level, flow, temperature) following established procedures.
- Conducted monitoring and basic troubleshooting of instrumentation and control systems.
- Read and interpreted technical drawings, wiring diagrams, and P&ID as work references.
- Assisted in instrument cable installation, junction box, and terminal works.
- Coordinated with maintenance and engineering teams to ensure systems operated normally.
